

Basic data of the subject	
University:	University “Ukshin Hoti” Prizren
Academic unit:	Faculty of Life and Environmental Sciences
Study program:	Agribusiness management
Course title:	Economics of Agriculture and Food Industry
Level:	Master
Course status:	Obligatory (O)
Study year/semester:	1 year / 1 semester
Number of hours per week:	3 + 2
Credit value – ECTS:	7
Time / location:	To be announced
Lecturer:	Dr. Sc. Nol Krasniqi
Contact details:	nol.krasniqi@uni-prizren.com; +383 44 702 505
Course description	
	This course provides students with the knowledge, understanding and analysis of the economics of agriculture and food industry, the equilibrium of market forces, which is the key to understanding the economics of the food industry and addressing problems such as allocating production between competing products, interregional trade, optimal storage etc. The course also examines the causes, severity and effects of persistent poverty, rapid population growth and malnutrition in developing countries. Discusses and analyzes possible solutions to these problems and considers the implications of globalization for agriculture, poverty and the environment.
Course objectives:	
	The aim of this course is for students to understand and analyze the agricultural economy development problems including the food industry. The course pays special attention to the development of students' skills to analyze the rational use of limited natural resources and the implementation of macro and micro economic policies that ensure the sustainable development of the agri-food industry. The course will prepare students to analyze the food industry, adapting the approach from the farm to the kitchen table. At the same time, the course focus to address the economics and management of food processing firms, including the analysis of the food supply chain (producers, wholesalers, and retailers) at the national and international levels. Simultaneously, the course aims to provide advanced knowledge of the development of foreign trade and international capital flows. Finally, the course also addresses topics related to environmental sustainability.

Learning outcomes:	Upon completion of this course, students will be able to: <ul style="list-style-type: none"> ▪ Understand and analyze theories of agricultural economic development. ▪ Analyze and understand the dimensions of food supply and demand locally and globally. ▪ Understand and analyze the process of interaction of supply and demand of agri-food products. ▪ Evaluate theories and practices of agriculture and food industry. ▪ Analyze and research the development strategies of the agriculture and food industry sector. ▪ Evaluate the development of agriculture, international trade as well as trade policies and agreements. ▪ Develop the skills to evaluate on the basis of the food industry, price economics for food processors. 		
Contribution on student load (must correspond with learning outcomes)			
Activity	Hours	Days/week	Total
Lectures	3	13	39
Exercise theoretical/laboratory	2	13	26
Practice work	1	3	3
Contact with lecturer/consultations	1	15	15
Field exercises	0	3	0
Mid-terms, seminars	1	1	1
Homework	1	13	13
Individual time spent studying (at the library or home)	2	15	30
Final preparation for the exam	2	8	16
Time spent in evaluation (tests, quiz, final exam)	2	2	4
Projects, presentations, etc.	3	1	3
Total			150
Teaching methods:	Lectures, exercises, discussions, consultations, course projects, homework, midterm exam, final exam.		
Examination methods:	Regular and active attendance: 10%, Midterm exam: 20%, Course project: 10%, Final exam: 60%.

<i>Fifth week:</i>	Land and Labor Markets, Entry and Credit Markets. Pricing policies and marketing systems.
<i>Sixth week:</i>	Basics of the Food Industry
<i>Seventh week:</i>	Cost economics for processing plants. Price economics for food processors.
<i>Eighth week:</i>	Midterm exam
<i>Ninth week:</i>	Storage economics, Deciding on the location and size of the plant
<i>Tenth week:</i>	Imperfect competition and game theory. Understanding Game theory is a sub discipline within economics that studies decision making in a competitive environment.
<i>Eleventh week:</i>	Development and launch of a new product. Special organizational characteristics in the food industry.
<i>Twelfth week:</i>	Agriculture and International Trade, Trade Policies, Negotiations and Trade Agreements.
<i>Thirteenth week:</i>	Agriculture and International Trade, Trade Policies, Negotiations and Trade Agreements.
<i>Fourteenth week:</i>	Macroeconomic Policy and Agricultural Development, Capital Outflows, Foreign Aid and Food Aid.
<i>Fifteenth week:</i>	Presentation and discussion of student semester projects.

Academic policies and rules of conduct:
<ul style="list-style-type: none"> ▪ Student should be aware of and respect the institution and Code of ethics. ▪ Student should respect the schedule of lectures, exercises and be attentive. ▪ It is mandatory possess and present student ID card in the mid-terms and exam,

- During compilation of course projects, student must adhere the instructions given by the professor.
- During the exam is forbidden the use of mobile phones.

Exercises

Designed study plan:	
Week	Exercises which will be held
<i>First week:</i>	Discussion and distribution of the semestral project topics.
<i>Second week:</i>	Assignments, quizzes and case studies related to the topic of the first week lecture.
<i>Third week:</i>	Assignments, quizzes and case studies related to the topic of the second week lecture.
<i>Fourth week:</i>	Assignments, quizzes and case studies related to the topic of the third week lecture.
<i>Fifth week:</i>	Assignments, quizzes and case studies related to the topic of the fourth week lecture.
<i>Sixth week:</i>	Assignments, quizzes and case studies related to the topic of the fifth week lecture.
<i>Seventh week:</i>	Assignments, quizzes and case studies related to the topic of the sixth week lecture.
<i>Eighth week:</i>	Assignments, quizzes and case studies related to the topic of the seventh week lecture.
<i>Ninth week:</i>	Assignments, quizzes and case studies related to the topic of the eighth week lecture.
<i>Tenth week:</i>	Assignments, quizzes and case studies related to the topic of the ninth week lecture.
<i>Eleventh week:</i>	Assignments, quizzes and case studies related to the topic of the tenth week lecture.
<i>Twelfth week:</i>	Assignments, quizzes and case studies related to the topic of the eleventh week lecture.
<i>Thirteenth week:</i>	Assignments, quizzes and case studies related to the topic of the twelfth week lecture.
<i>Fourteenth week:</i>	Assignments, quizzes and case studies related to the topic of the thirteenth week lecture.
<i>Fifteenth week:</i>	Presentation of the course projects.
